

EXTEND THE LIFE OF YOUR ROOF

WNC ROOFING'S PREVENTATIVE MAINTENANCE PLAN

All commercial roofs require regular maintenance to keep your roofing system performing at its best and to avoid any damage that may be caused by natural or human interaction. Just like changing the oil in your vehicle, routine maintenance allows you to plan and budget for the year while avoiding unexpected expenses down the road. With a scheduled plan, you can ensure your roof's warranty requirements are met in the event a claim is ever required for unexpected roof repair or replacement.

WNC Roofing's Maintenance Plans are designed to turn your reactive roofing emergencies into a proactive plan that provides you a stress-free solution to ensure your roof performs to its maximum life.

PREVENTATIVE MAINTENANCE PLAN

- Two experienced roof technicians
- Inspection of roof seams, penetrations, and field
 - Cleaning of debris and dirt from the roof
 - Cleaning of drains/ gutters
- Repair of any minor roof issues with required material
- Photo documented report of work performed and noted deficiencies

Daily maintenance pricing depends on the roof size, complexity and condition. Pricing will be adjusted to accommodate the specific needs of each location. Prices are subject to sales tax.
